How to submit your PhotoSesh profile.

Your profile will undergo random reviews and be subject to our terms of use.

The screenshot shows a mobile app interface for a photographer's profile. At the top, the status bar shows "Verizon", "4:21", and battery level. Below the status bar is a navigation bar with a back arrow and the title "Photographer Profile", which is circled in red. The profile section includes a circular profile picture of a woman, the name "Kelly Simpson", and several fields for profile information. The "Photosesh Type" is set to "PhotoSesh". The "Minimum Session" is set to "1.5 hr". The "Price" is set to "\$65/hr". The "Saves" are set to "35%". Below these fields is a section titled "Equipment & Bio" with a text area containing the following text: "7 years experience ... Canon 70D / iPhone6S plus / GoPro. Fast turnaround of high res digital images under 24 hours. 8x10 of your favorite pic at no charge. I have a bachelor's degree in Photography from Pace University. Past clients include New York Magazine." Below this is a "Fun Fact" section with the text "I have 4 dogs!". At the bottom is an "Upload Portfolio" section with a note "You can upload a maximum of 12 images". Two images are shown in the portfolio: a sunset with a silhouette and a poolside scene. An "UPDATE" button is at the bottom of the form.

PhotoSesh or PhotoSesh LIGHT?

We have 2 networks of artists within the PhotoSesh community.
Freelancer Photographers and iPhoneographers

PhotoSesh:

If you are a professional or talented photographer with the real-deal equipment (et al. DSLR, flashes, proper accessories) we invite you to apply to our PhotoSesh network.

PhotoSesh LIGHT:

If you are part of the up and coming trend of iPhoneographers and exclusively use your iPhone to bring out your inner photographic artist, then PhotoSesh LIGHT is for you. If you are a professional you can also switch to LIGHT when in an environment where you may not have your other equipment such as festivals, touristy areas, and generally any random busy place.

Minimum Session?

Sometimes in busier areas, less is more. As an example, offering half hour sessions in Times Square may get you more business. Plus they might only be 10-15 minute sessions but billed at your minimum 30min.

So if in rural or less crowded areas you may want to increase your minimum length of session.

Your discount pricing is what customers love about PhotoSesh. Show your PhotoSesh price and remind customers what percentage it saves them from your normal rates. Remember, you can charge full rate with a shared customer offline. But when it comes to discounting, it must be done through our platform when involving a shared customer. We believe this can create a balanced outcome of repeat business and referral flow for both PhotoSesh at discounts and you as a partner at full rate.

PHOTO SESH

Your Equipment & Bio is your chance to sell yourself. Talk about your tools, your experience, and share your personality. You can also mention your turnaround times and some perks in working with you. Feel free to include some hobbies and your passion for photography. Maybe mention your studio address in case someone wants to book a studio PhotoSesh. Anything goes up to 1,000 characters, but vulgar or offensive language will not be approved.

If you have a studio, maybe include that info with an address in your bio.

Hint: If you're at a huge music festival or in a busy area for an event, you can be creative and include announcements in your Bio or Fun Fact: "Find me at EDC NY on May 14th!!"

The goal for the Fun Fact is to make someone smile. :-)

You can upload up to 14 images which must be uploaded through your iPhone device. This may require you to transfer pics from your computer to your iPhone via email or other transfer types.

All descriptions of requests are exactly what your customers see when submitting a request. Although it's always nice to step outside your comfort zone, please only choose events you are comfortable and capable of shooting. Remember, you will be rated after each PhotoSesh transaction. And of course make sure you carry the appropriate equipment for the categories you choose to take on.

Periscope Assistant

Do you broadcast on Periscope? Use PhotoSesh™ to get some help with your 'scoping.' A Periscope assistant can help you broadcast and read out comments.

Periscope is still in its early phase of popularity but is growing fast. Twitter account holders basically have a Periscope account if they want it. If you know how it works, why not be available to accept Periscope gigs to accommodate PhotoSesh customers that love to "scope." Only equipment needed is an iPhone. You would help a customer livestream and read aloud their incoming comments from the public. Simple as that.
